Abc..... according to astrology Libra ascendant (tula lagna) and Sagittarius moon sign (dhanu rashi) is rising in your horoscope, Saturn mercury & Venus are favorable planets in your horoscope.

In your horoscope Sun is in its own sign this is a good combination which shows you are a confident and dedicating person for your duties and because of strong sun you have strong will power, Jupiter (planet of knowledge) aspects Mercury (planet of intellect) which makes you an intelligent and deep thinking person but Saturn and Rahu aspects moon in your horoscope so there would be mental instability in your life and you will also face over thinking problem.

In your horoscope combination of Mercury (9<sup>th</sup> house lord) & Venus (ascendant lord) is a benefic combination which creates opportunities in life and because of strong sun you will be a respectable person in society but some malefic planetary combination also present in your horoscope which makes your life struggle full in your horoscope Jupiter and mars are debilitated which stops growth in your life and creates instability or ups & down in your life.

**Career** : you specially asked about your career and job so.....according to astrology in horoscope 10<sup>th</sup> house and its lord represent our career and Saturn also signifies our professional life, in your horoscope debilitated mars is posited in 10<sup>th</sup> house (house of career) because of this 10<sup>th</sup> house is so weak in your horoscope which creates hurdles in career besides this Saturn is exalted in your horoscope normally exalted Saturn gives a strong career but here Saturn is under malefic influence of ketu which reduces Saturn's power so because of exalted Saturn you will get opportunities in your career but not according to your expectation, Mercury & Venus two benefic planets sports your career house but

specially debilitated mars is a negative part in your horoscope 10<sup>th</sup> house is so weak because of debilitated mars, so according to planetary combination in your horoscope your career would be struggle full and you have to do much efforts to succeed, because of weak 10<sup>th</sup> house person doesn't get expected results in career and so strong sun makes you dedicating for your works but weak 10<sup>th</sup> makes your career unstable, (we will recommend some astrological remedies for this)

In now days moon antardasha (8/6/2016 to 8/4/2017) is running in moon mahadasha (8/6/2016 to 9/6/2026) in your horoscope, moon is 10<sup>th</sup> house lord and aspects 9<sup>th</sup> house (house of destiny) so moon antardasha is good for you but you are facing Saturn's sadesati from November 2014 which is struggle full for you and there would be ups and down for you in last two years now Saturn will enter in Sagittarius (in your moon sign) which will also be struggle full for you, besides this mars antardasha will start from 8/4/2017 to 8/11/2017 and mars is debilitated in 10<sup>th</sup> house so according to planetary combination upcoming time is not good for your career and there will not be any major opportunity in your career soon but on 12<sup>th</sup> September 2017 Jupiter will enter in Libra which will be helpful for your career and you will find betterment in your career because of Saturn's sadesati there would not any major change but you will find betterment in your career or job after September 2017 but as we mentioned according to planetary combination your career is struggle full so you have to follow some astrological remedies always.

If we see career in future then after mars antardasha there will be Rahu and Jupiter's antardasha between November 2017 to September 2020 this time period will also not be very good for your career it will be average but after this there will be Saturn and Mercury antardasha between 7/9/2020 to 8/9/2023 which will be fruit full for you specially for your career so between September 2020 to September 2023 your career will improve and you will find many opportunities in your career in that time.
